

Automation Products Parts List Concept™ V2.6 Programming Software

Microsoft® Windows based programming tool for industrial automation applications. Features include online and offline programming and documentation. Can be used for developing and maintaining programs. Concept V2.6 software installation is bundled in 2 CDs; installation requires both CDs. The first CD contains the core Concept V2.6 installation files. The second CD includes Service Release 1 (or higher if appropriate), appropriate Execs, the loader utility (ExecLoader) and PDF help files and PDF User Manuals. Minimum hardware: x86-based personal computer (Pentium platform recommended); Microsoft Windows 98/2000, Microsoft Windows NT 4.0 Service Pack 5 (Y2K compatibility requires SP5) or Microsoft Windows XP; 64 MB application RAM (or higher); CD-Rom drive; 100 MB hard disk space; VGA graphics adapter and screen (minimum resolution: 800x600); Microsoft compatible mouse. Printed versions of manuals ordered separately.
